REBATE PROGRAMS

Rebates Made Rewarding

ABOUT

Our Service Department offers decades of proven expertise in monitoring and resolving service related issues. We ensure performance through a commitment to regularly scheduled, comprehensive maintenance & repairs; and extend our partnership with a number of optimization and rebate programs – including SCE HVAC Optimization & Green Riverside.

APPROACH

Because of our deep expertise within the commercial HVAC industry, we're able to leverage decades of knowledge—along with the latest advancements—to determine which rebate program in your area best suits your unique project needs.

ADVANTAGE

Whether it's for maintenance or replacement, taking advantage of rebate programs is a great way to save money and free up resources for other projects. Look to ACS for the latest incentives available.

Our Process Your Results

1

It all begins with an inspection of eligible HVAC units by one of our trained HVAC technicians. We identify opportunities for your HVAC units based on your area, unit specifications, and more.

PROVEN REBATE EXPERTISE IN

- HVAC Early Retirement
- HVAC Optimization
- Energy-Efficiency

2

Considering all the details of your project, the inspection findings, and the available rebate program(s), the ACS team calculates your anticipated incentive amount for the eligible units.

3

Once the rebates are approved, ACS works with you as needed to submit the related applications, facilitate reviews and on-site inspections, and follow up throughout the process to ensure you receive the rebates available.

4

Our team manages the final steps of the process, helping ensure you receive payments for all eligible rebates, before concluding the project.

The process begins with you.

Contact ACS today to put our experience to work.
